

HIGH-FLOW INTAKE SYSTEMS

**+7.58 hp**

**Scion TC Gets 7.58 More Horsepower with K&N High-Flow Intake System**

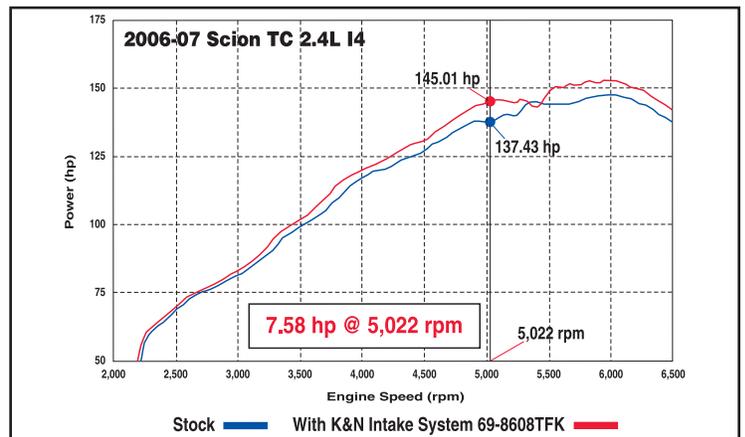

The K&N High-Flow Intake System for the 2005-06 Scion TC L4 2.4L (part no. 69-8608TFK), increases performance by 7.58 hp at 5022 rpm over the stock intake configuration. To achieve a performance increase, the TC's stock air filter, intake tube and bottom half of the air box are scrapped and replaced with a unique intake design that utilizes OE and K&N components. The new design draws air through a trapezoid-shaped K&N High-Flow Air Filter that increases airflow and filtering capacity and never needs to be replaced. Reinforced by a Grivory cage, the air filter attaches to the upper half of the TC's stock air box, which remains in its original position to house the OE mass airflow sensor (MAF) and hydrocarbon trap.

Protecting the air filter, MAF and hydrocarbon trap and isolating them from engine heat is a powder coated steel heat shield. As it passes the filter, air travels through a metal intake tube that is formed and shaped in the design phase to drive a more laminar flow of air to the TC's engine. By utilizing OE components, the 69-8608TFK is the first aftermarket intake system for the 2005-06 Scion TC to receive an Executive Order from the California Air Resource Board, making it a 50-state legal intake system.

The 69-8608TFK can be easily installed in approximately one hour, is currently available where quality performance is sold, is backed by the same K&N Million Mile Limited Warranty® as all K&N OE Replacement Air Filters and has an MSRP of \$436.38.

#69-8608TFK

Part#	Application	Available	MSRP
69-8608TFK*	2005-06 Scion TC 2.4L I4	Currently Available	\$436.38

\*Street legal in 50 states. \*\*Street legal in most states. Not legal for street use on emissions controlled vehicles in the state of California.

K&N Engineering, Inc., with headquarters in Riverside, California, has been the world's leader in performance filter technology since 1969, serving the needs of the automotive, motorcycle, marine, industrial and military markets. K&N is heavily involved in nearly every form of motorsports, from off-road and powersports, to drag racing, stock cars and road racing. [KNFILTERS.COM](http://KNFILTERS.COM)® • 800-858-3333
