K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/Million mile limited warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Lower the carpet below the glove box compartment and remove the three screws. (Fig. 1)
2. Open the glove box and remove the top three screws. (Fig. 2)
3. Remove the side panel and the screw. (Fig. 3 & 4)
4. Carefully remove the glove box compartment and disconnect the wire connector. (Fig. 5 & 6)
5. Locate the cabin door and remove the screw. (Fig. 7)

NOTE: Some models may not have a screw on the cabin filter door and may have a support bar in front of the cabin filter housing. The support bar needs to be removed to replace the cabin air filter.

6. Remove the dirty cabin filter and any debris that might be present inside the housing. (Fig. 8)
7. Install the K&N® cabin air filter. (Fig. 9)
8. Reverse steps 1-5 to complete the cabin filter installation. With the K&N® cabin filter installed, clean an area and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
