Fuel System Cleaner (99-2050)

-
- High-Grade Fuel System Cleaner For Direct Injection and Traditional Engines
 - Restores Engine Power and Improves Fuel Efficiency
 - Reduces Carbon Buildup
 - Restores Lost Acceleration and Throttle Response
 - Direct Injection Detergent
-

DESCRIPTION:

Think about your car for a moment. Although it might look clean and polished on the outside on the inside it's dirty. Especially new GDI engines. Fuel injectors in GDI engines get so dirty, so fast you can actually start feeling the poor performance within 10k miles. Leave these injectors untreated and next thing you know, you are stuck with a slow, engine shaking car that just doesn't go like it used to. Sounds like a complicated problem, right? Well, our chemists don't back down from a challenge. We know what it takes to formulate and innovate technology others can't and that's why 104+ Fuel Injector Pro is the ultimate fuel system and injector cleaning solution.

DIRECTIONS:

- Add entire contents of first bottle to gas tank and fill with fresh fuel.
- Once the tank of gas is used, repeat this process with a second bottle for best results.
- One Bottle treats up to 21 gallons.
- Safe for all gasoline engines.
