

INSTALLATION INSTRUCTIONS

Part Number E-1990

This filter fits: See catalog for current applications

* FREE K&N® decal To register your warranty, please see us online at knfilters.com/register. FREE K&N® decal *

Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter is a direct replacement for the stock air filter, and no modification will be required. However the following procedures MUST be followed to ensure the proper fit and seal of the K&N® air filter.

INSTALLATION:

1. Remove the air box lid by un-snapping the air box lid clips, then remove the OE air filter from the air box. (Fig. 1)
2. Make note of the highlighted area of the bottom surface of the air box. There is a concave ridge that the K&N® air filter's lid will fit into. (Fig. 2)
3. Install K&N® air filter into air box. The air filter lid has a flower-like appearance with several rounded edges. Line up one of the air filter's rounded edges with the concave ridge in the air box and apply pressure until the air filter snaps securely into the air box's concave ridge. (Fig. 3 & Fig. 4)
4. Reinstall the air box lid and secure the air box lid clips.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
