Congratulations, you have just purchased the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N<sup>®</sup> air filter seals properly.

## INSTALLATION:

- 1. Remove the stock air filter.
- 2. Install the K&N<sup>®</sup> air filter making sure it is centered in between the two cover mounting posts. (Fig. 1)
- 3. Reinstall the air box cover.

# THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
