

INSTALLATION INSTRUCTIONS

PART NUMBER: VF4003

This Assembly Fits:

SEE CATALOG FOR CURRENT APPLICATIONS

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

1. Locate hood latch from inside the car and open the hood. **Fig. 1 & 2**
2. Raise the hood and secure with the hood prop. **Fig 3**
3. Locate the cabin filter housing. **Fig 4**
4. Remove the felt cover from housing to gain access to the cabin filter cover. **Fig 5**
5. Unlatch cabin filter cover and remove. **Fig 6**
6. Remove dirty cabin air filter. Clean any dirt or debris that might be present. **Fig 7**
7. Install K&N cabin air filter into cabin filter housing. **Fig 8**
8. Reverse steps 1-5 to complete the installation. With the cabin filter installed, clean an area on the cabin housing and apply the K&N Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
